

PRINCEWILL C. CHIOMA

AI Systems Engineer | LLM Engineering | Agentic AI | RAG | MLOps | Cloud-Native AI

📍 Lagos State, Nigeria | ✉ chiomaprincewill@yahoo.com | 📞 +234 813 076 5008
🌐 [linkedin.com/in/pwill01](https://www.linkedin.com/in/pwill01) | 🐙 github.com/MrPwill

PROFESSIONAL SUMMARY

AI Systems Engineer with 1.5+ years of direct production AI engineering experience and 10+ years of combined data science, software engineering, finance, operations, and automation expertise.

Specialist in designing, building, and deploying enterprise-grade Generative AI, RAG pipelines, fine-tuned LLMs, voice AI, and fully autonomous multi-agent systems using Google ADK, CrewAI, LangGraph, AutoGen, MCP, n8n, ElevenLabs, AWS Bedrock, SageMaker, Terraform, and LangFuse.

Unique strength: Deep technical AI skills combined with strong financial services domain knowledge (former Finance Manager & Bank Auditor). Proven ability to deliver measurable ROI through automation, cost reduction (28%), productivity gains (50%), and regulatory-compliant AI solutions.

CORE TECHNICAL SKILLS

AI & LLM Engineering	RAG • QLoRA • Fine-Tuning • Multimodal AI • Prompt Engineering • LLM Selection & Orchestration • HuggingFace • LangChain • Gradio • Vector Embeddings & Stores • Hybrid Scoring: Rule Engines + ML (Isolation Forest, LOF) • SHAP Explainability • Model Drift Monitoring
Agentic AI & Frameworks	Google Agent Development Kit (ADK) • OpenAI Agents SDK • CrewAI • LangGraph • AutoGen • MCP (Model Context Protocol) — multi-server, 44+ tool integrations • Autonomous Agent Loops • Multi-Agent Teams • Async Celery Orchestration • RAG Knowledge Bases (ChromaDB, Pinecone)
MLOps & Cloud Production	AWS (Bedrock, SageMaker, Lambda, SQS, Aurora Serverless, App Runner, CloudFront, Route53, S3 Vectors) • GCP Cloud Run • Cloud SQL • Memorystore Redis • Secret Manager • Terraform IaC • Azure ML • Hybrid Cloud Architectures • Vercel + Next.js SaaS • Clerk Auth • Guardrails • Docker Multi-Stage Builds • GitHub Actions CI/CD • LangFuse Observability • Real-Time: WebSocket • Server-Sent Events (SSE) • Redis Pub/Sub
Programming & Data	Python (expert) • SQL • FastAPI • TypeScript/Next.js 14 (App Router) • ETL Pipelines • Pandas • scikit-learn • PostgreSQL • Google Sheets + APIs • REST API Design • Async Programming
Automation & AI Integrations	n8n • Zapier • Make.com • Airtable • API Integrations: OpenRouter, Serper, SendGrid, WhatsApp, Slack, Email • ElevenLabs Voice AI • Synthetic Data Generation
Domain Expertise	Financial services automation • Regulatory compliance (AML, CBN, NFIU) • Fraud detection patterns • Forecasting • Cost optimization • SAR/CTR reporting • Sanctions screening (OFAC)

PROFESSIONAL EXPERIENCE

Stardom Financial Services Limited AI Engineer Lagos, Nigeria Hybrid	<i>Sep 2024 – Present</i>
--	---------------------------

- Designed and deployed autonomous AI agents for real-time financial monitoring, automated reporting, and operational workflows
- Built enterprise RAG-powered knowledge systems enabling instant querying of internal documentation and shared drives
- Developed agentic workflows using n8n to automate CRM updates, reporting pipelines, and multi-stakeholder notifications
- Implemented production voice AI agents with ElevenLabs for customer interaction and internal automation
- Integrated LLMs with Google Sheets, REST APIs, WhatsApp, Slack & Email — eliminating dozens of manual processes
- Currently building the company's first multi-agent financial analyst team using MCP + AWS Bedrock

Extreme Tech Svcs Limited
Software Engineer (Full-time) | Hybrid

Mar 2021 – Aug 2024

- Built and deployed 5+ full-stack applications for SMEs using Python, FastAPI, Next.js, TypeScript, JavaScript, and PostgreSQL
- Developed backend APIs for authentication, reporting, payments, and third-party integrations
- Reduced manual business processes by 35% through intelligent automation
- Designed frontend dashboards that improved operational efficiency by 30%
- Improved API performance by 40% via caching, query optimization, and async patterns
- Reduced deployment time by 50% using Docker, GitHub Actions, and AWS infrastructure

BOCH SYSTEMS WEST AFRICA

May 2016 – Feb 2021

Business Operations & Finance Manager | Lagos, Nigeria | Full-time

- Led financial modeling, forecasting, and strategic analysis for West Africa operations
- Achieved 28% reduction in operational costs through data-driven optimization
- Increased overall productivity by 50% via workflow automation and internal dashboards
- Delivered analytics dashboards that significantly improved executive decision-making efficiency
- Supported 15+ large-scale projects while maintaining 85%+ customer satisfaction

Guaranty Trust Bank (GTBank)

Jul 2013 – Apr 2016

Internal Control / Audit Officer | Lagos State, Nigeria | Full-time

- Reconciled general ledger with correspondent banks and cleared outstanding items
- Conducted full AML audits across branches, compliance, ORM & MRM units
- Prepared and reviewed regulatory returns to CBN and NFIU with 100% accuracy
- Coordinated external audits and implemented regulatory changes in real time

EDUCATION

- **BSc Computer Science** — University of the People
- **Certificate, Applied Data Science Lab** — WorldQuant University
- **Advanced Diploma in Accounting and Business** (ACCA pathway)
- **HND, Secretarial Administration** — The Federal Polytechnic Nekede, Owerri
- **Professional PGD, Customer Relationship & Management** — ICRM

LICENSES & CERTIFICATIONS

Advanced AI Engineering — Ed Donner (Udemy 2025)

- AI Engineer Core Track: LLM Engineering, RAG, QLoRA, AI Agents
- AI Engineer Agentic Track: The Complete Agent & MCP Course
- AI Engineer MLOps Track: Deploy Gen AI & Agentic AI at Scale

Additional Certifications

- Google Agent Development Kit (ADK) — Building AI Agents with Google ADK
- AI Engineering Essentials: Navigating the Tech Revolution
- AI Leadership Track: Gen AI, Agentic AI for Business Leaders
- ChatGPT Prompt Engineering for Developers — DeepLearning.AI
- AI Fundamentals — DataCamp (Credential ID: AIF0020038125681)
- Associate Data Engineer in SQL — DataCamp
- Certificate in Network & Application Security — University of the People (Sep 2025)

PINNED GITHUB PROJECTS

github.com/MrPwill / 91+ contributions last year / Python 57.7% • TypeScript 32.1% • HCL 6.3%

txguard — Intelligent Transaction Monitoring & Fraud Investigation Python

Hybrid risk scoring <200ms: Rule engine + Isolation Forest/LOF
4-agent CrewAI investigation pipeline with RAG knowledge base
SHAP explainability + immutable audit trails
Next.js 14 dashboard with WebSocket alerts & SSE streaming
GCP Cloud Run deployment via Terraform: Cloud SQL + Memorystore Redis
Tech: FastAPI • Python • Next.js • CrewAI • ChromaDB • PostgreSQL • Redis+Celery • Docker • Terraform • SHAP

slate-pm — AI-Powered Kanban Project Management TypeScript

Five-column Kanban: Backlog → Todo → In Progress → Review → Done
AI task generation: Converts goals → actionable tasks via OpenRouter
Auto complexity analysis (Simple/Medium/Complex) & intelligent tagging
Real-time Supabase sync with offline-first localStorage fallback
Row Level Security (RLS) for collaborative board sharing
Tech: Next.js 15 • TypeScript • Tailwind CSS 4 • Supabase • OpenRouter • dnd-kit • Zustand

clause_guard — Legal Document Platform for Africa TypeScript

Jurisdiction-aware contracts: Nigeria (CAMA/NDPR), Kenya, Ghana, South Africa
Specialized tracks: Freelancer • Startup/SME • Creator/Influencer
AI questionnaire wizard + streaming document generation via OpenRouter
E-signature support + professional PDF export with custom branding
Supabase backend with RLS for document privacy
Tech: Next.js 16 • TypeScript • Supabase • OpenRouter • @react-pdf/renderer • react-signature-canvas

ai_sdr_agent — Autonomous Outbound Revenue Engine Python

Multi-agent pipeline: Lead Research → ICP Score → Qualify → Email → Reply Handle
Lightweight CRM with deduplication & cooldown logic
SendGrid webhook integration for inbound reply classification
Guardrails for input validation & output safety on AI content
Configurable ICP rules engine for business-specific qualification
Tech: Python • FastAPI • OpenAI/Serper • SendGrid • SQLite • Pydantic • uv

AI-Customer-Support-Agent — Function-Calling Support AI Python

Real-time support agent with OpenAI function calling for DB operations
Executes real actions: check orders • manage tickets • update profiles
Context-aware conversation history with brand persona enforcement
FastAPI backend + glassmorphism HTML/CSS/JS frontend

Robust logging for monitoring, debugging, and audit compliance

Tech: Python • FastAPI • OpenAI API • SQLite • HTML/CSS/JS • Pydantic

pwill_synthetic_data_generator — Multi-Agent Data Platform

Python

Self-correcting agentic loop: Generator → Judge → Refiner for quality

Multi-model support via OpenRouter: Llama 3, Mistral, DeepSeek, Qwen

Strict JSON schema validation + logical correctness checks

Export formats: JSON • CSV • Pandas • raw text/reasoning chains

SQLite persistence with SQLAlchemy for audit trails of all runs

Interactive Gradio UI for configuration & real-time monitoring

Tech: Python • Gradio • OpenRouter API • Pydantic • SQLAlchemy • uv

ADDITIONAL ADVANCED SYSTEMS (15+ COMPLETED)

- Multi-modal AI assistants with function calling & UI integration
- Autonomous multi-agent ecosystems with MCP integrations & tool orchestration
- RAG-based knowledge workers for enterprise documentation
- AI developer tools (Python→C++ optimizer: 60,000× performance boost)
- Financial forecasting & trading AI with real-time market data
- Cybersecurity analyst agents with browser automation & threat intelligence

PERSONAL ATTRIBUTES

- Excellent communicator — explains complex AI concepts to non-technical stakeholders
- Strong problem-solver with proven delivery under tight deadlines
- Passionate about ethical, cost-efficient, production-ready AI
- Fast learner always at the cutting edge of Agentic AI and MLOps
- Compliance-first mindset: builds audit trails, explainability, and regulatory alignment into every system

AVAILABILITY & ENGAGEMENT

Currently building multi-agent financial analyst teams, production Digital Twins, and TxGuard AI.

Actively seeking:

- AI Engineer | LLM Engineer | Agentic AI Engineer | GenAI Platform Engineer roles
- Freelance/consulting projects in AI system design and deployment
- Collaborations where autonomous AI can drive revenue and operational transformation

Open to remote and hybrid opportunities globally.
